Gulf Security Technology Co., Ltd (referred to GST), is a key player in the fire and safety industry and a trusted provider of comprehensive fire system solutions around the world. Since its establishment in 1993, GST has become a major brand in domestic China, widely recognized by users.

The GST Qinhuangdao manufacturing facility has established itself as a premier production hub for intelligent electronic products within the fire safety sector. This is attributed to its state-of-the-art production lines for electronic devices, a robust production management system, stringent quality control measures, and a scientifically-driven quality clinic management approach. The facility's product range is comprehensive, encompassing early-stage fire detection, intelligent evacuation systems, and advanced firefighting technologies. Tailored to diverse requirements, GST's products have garnered a range of certifications from both national and international bodies, including CCC, UL, LPCB, CE, SAI, and EAC. GST's reach extends globally, offering a suite of fire safety solutions that cater to the commercial, industrial, and residential sectors. The company provides a one-stop solution for all fire safety needs.

Beyond high-quality products, GST is dedicated to delivering comprehensive lifecycle service solutions for building fire safety systems. Leveraging a digital service platform, a nationwide network of over 100 sales and service outlets, and a team of more than 600 seasoned technical engineers, GST ensures that its customers receive services that are professional, intelligent, and efficient.

For more than three decades, GST has been at the forefront of providing holistic and efficient one-stop fire safety solutions. The company is committed to enhancing the quality of life and fostering the growth of modern urban development.
