

# DB-01D

## Diode Base

### Description

A common base for GST conventional DC series detectors, provides mechanical fixing and electrical connection. There is no electrical component on the base. Together with Active End of Line unit, the diode base can build a non-breaking line of a conventional zone, so that even a detector is removed from the base, the following devices can still work.

The DB-01D base has 4 terminals marked with 1-4. For the detail connections, please refer to the manual of installed detector.

### Technical Specification

- Compatible Devices:  
DC-9101E, DC-9102E, DC-9103E, DP-9907
- Material: ABS
- Dimension: 103mm(D) X 14mm(H)

### Installation Details

### Order Information

Part No.	DB-01D
Device Name	Diode Base
Product No.	20101432

**IMPORTANT:** This publication is a generic version in which product information is shown for informational purposes only and does not constitute a specific commitment or guarantee. We are constantly pursuing the improvement of product technology to improve product performance, for which we reserve the right to adjust the configuration and technical information of the related products without notice. In addition, the description of system performance in this publication applies only to the usual situation. As a result, there may be a variety of unpredictable special circumstances in the real world, so the realization of the relevant product performance will depend on the professional investigation and analysis and the design plan. Please contact us and we will be happy to provide you with professional advice.
