

Description

The P-9911(F) fixed fire telephone communication point is compatible with the GST-FT series of fire telephone panels, for emergency communication over a dedicated hard wired system normally located with the fire command center.

Installation

The fixed handset is wall mounted, available for surface mount. The unit should be mounted in a suitable and dry location at about 1.5m from finished floor level. Common installation positioning is in the landing levels of all core stairwells and escape routes, although the exact positioning is the responsibility of the project designer. Each zone is connected to the command center using a fire rated 1.0mm² or above twisted pair. Please test it after installation.

Operation

Receive Call

Break the glass, open the door, lift the handset to talk with the control panel when the handset is ringing. Hung up the handset to stop conversation.

Call Control Center

Break the glass, open the door, lift the handset, the fire telephone panel in the control room will get ring, and the relevant zone calling indication will illuminate. Once the control center accepts your call, you are connected for direct voice communications.

Specification

| | |
|-----------------------|--|
| Frequency Range | 300 ~3400Hz |
| Ring Sound | ≥70dB(A) |
| Dimension | 234mmX146mmX60mm |
| Operating Environment | Temperature:-10°C~ 50°C Humidity≤95%,non condensing |
